Thursday 02nd December 2021

Dear Parents,

Term III and IV Fees

Thank you for your continued support, including the financial commitment throughout the years, which has been essential to the school's short term and long term security. For this, we are really grateful. It is with the support of the overall school community that we have been able to resume the normal operation of the school.

As per our previous communication regarding the school's position to continuously support the families navigate through the difficult time, **the school fees have again been frozen for Term III and Term IV of the academic year 2021.22** i.e the school fees remain frozen at 2019.20 level until the end of 2021.22 academic year.

As the situation continues to get back to normal, the school shall continue monitoring the situation and review the fee structure for the new academic year 2022.23. The decision about how much the fees should increase will depend upon various factors such as student numbers, national inflation rate, campus upgrades, and other national and international contextual factors. Ideally the school is looking to propose smaller incremental increases in coming years and avoid drastic fee jumps in any one year.

The finance department shall share the fee invoice for Term III (with no increase from this Term) along with the letter mentioning the points to be considered while making the payment by the end of next week. We request the fees to be cleared within the due date.

As always, please contact us if you are facing any difficulties with payments so that we can, as far as possible, assist you during this challenging time.

With Best Regards,

Caro Drumm
Principal
